# Introducing Prinker

## **Prinker: The World's First Temporary Tattoo Printer**

Prinker is the world's first device that allows you to apply customised temporary tattoos in seconds. Perfect for any occasion or style, it turns wearable art into a personal statement.

Using 100% safe, cosmetic-grade ink and primer, Prinker is non-toxic and globally certified, meeting standards such as FDA MoCRA, EU CPNP, and UK SCPN. Its gentle ink is suitable for all skin types, making it appropriate for all ages and providing a fun, educational way to explore creativity.

Prinker tattoos can last up to three days and are water-resistant yet easy to wash off with soap and water. Whether personalising your look or trying new designs, Prinker is commitment-free and pain-free. No regrets, never basic!

## **Why Prinker?**

Prinker is a user-friendly, sticker-free alternative to traditional tattoos, offering over 11,000 designs via the free app or the option to upload your own. The Prinker S is recommended for professional heavy use and the Prinker M is recommended for personal use.

## **Ideal for Creatives and Businesses**

Perfect for young creatives, stylists, makeup artists, fashion designers, and brands, Prinker adds a dynamic edge to events and marketing campaigns. Its collaborations with global brands such as Louis Vuitton, Coach, Nike, and Coca-Cola showcase its impact and ability to create a lasting impression.
