- No more costly replacement filters. Ever.
- Washable collecting plates save money & the planet.
- Whisper-quiet and ultra-low energy consumption.

AirSoap

Air purifier

AirSoap is a revolutionary new air purifier technology that kills and captures even the smallest viruses HEPA filters can't.

Proven to kill 99.99% of airborne viruses*, AirSoap uses washable and reusable collection plates instead of costly HEPA filters.

AirSoap is the best choice for your health, your wallet, and the planet.

AirSoap's™ Electric Wind Technology™ generates a high-energy plasma field that kills bacteria and viruses and polarizes airborne particles.

The bacteria are then collected in a filterless graphene system, resulting in air that is cleaner and healthier than what traditional filter-based air purifiers can provide.

PhoneSoap Shine

In a bottle: More than 150 sprays
